

Tell A Tale

Years K to 4

Windows/Mac CD

RRP Single user \$90

(GST inc.) Site licence \$180

Story writing at its most simple.

This marvellous package allows very early readers to start writing their own stories — and they can do this even before they have learned how to write!

Simple three-sentence stories can be constructed through an easy menu interface. For each story, the writer can select an opening, a location, an actor (such as the dragon shown at the left) and an action.

The resulting story is beautifully illustrated and animated, and is spoken by the computer. There are over a hundred possible story combinations, at three different reading levels. Options exist to replay the story, and to print it.

The package includes printable worksheets, to encourage work away from the computer.

Both this software and its sequel ***Tell A Tale 2*** are designed to be very clear and easy to operate.
